DESCRIPTION

The AIR-EAGLE SR PLUS RF TRANSCEIVER IS a dual I/O unit designed to transmit and receive unique signals from another transceiver located up to 600 feet away. This model comes equipped with two contact inputs and two high current SPDT relay outputs. This allows the user to not only transmit information out, but receive a confirming signal back that the operation was performed. The Air-Eagle SR PLUS TRX is user-programmable for up to eight network frequencies to allow multiple systems to operate simultaneously in the same area and utilizes spread-spectrum technology and provides the utmost security and reliability even in the noisiest RF environments.
