PRODUCT INFORMATION BULLETIN

RUBBER DUCK ANTENNA 900MHz - 2.4GHz MODEL 49-1103 – 900MHz

MODEL 49-1201 – 2.4GHz

DESCRIPTION

A TNC Portable Antenna, aka “Rubber Duck Antenna” is supplied with all Air-Eagle 900MHz and 2.4GHz mountable control units. This antenna connects directly to the control unit by TNC connector. The antenna should never be blocked by metal. Should the control unit need to be housed in a metal cabinet or building, the Rubber Duck Antenna can be extended away up to 7 feet away by use of a coax cable supplied by BWI Eagle.

ANTENNA EXTENDER MODEL 49-5004-X-ISO

DESCRIPTION

A TNC Male to TNC Bulkhead cable assembly used to provide a remote mount for the supplied rubber duck antenna. Available lengths:

Part Number	Length
49-5004-2-ISO	2 Foot
49-5004-4-ISO	4 Foot
49-5004-7-ISO	7 Foot

Note – If an extension longer than 7 foot is needed, the rubber duck antenna must be replaced by an external high gain antenna with a separate piece of low loss coax in lengths of 15 or more feet to connect to control unit.
